ISO POLY FILMS & SIGMA PLASTICS GROUP ANNOUNCE STRATEGIC PARTNERSHIP

Alliance will bring greater expanded film capabilities to benefit customers

GRAY COURT, SC – February 25, 2009 – ISO Poly Films, Inc. and Sigma Plastics Group announced today a strategic partnership. This alliance brings together the companies' strengths in product development, film quality, advanced systems and market presence to allow both companies to grow and offer expanded film and capabilities to their customers.

"We are extremely excited about this partnership and the opportunities it brings to ISO Poly Films in allowing us to continue to grow, even during these most difficult economic times," said Jon McClure, Founder and President of ISO Poly Films. "Sigma is a marketplace leader and we feel confident that aligning ourselves with a larger company will create a win-win-win situation for our customers, employees and the community."

ISO Poly Films – which operates a 135,000-square foot facility in Gray Court, SC – is a custom extruder of high-end multi-layer plastic films for the food, medical and industrial markets. The company celebrated its 10th anniversary last year and has invested more than \$35 million in the development and expansion of its state-of-the-art facility and in manufacturing equipment. ISO Poly currently offers a wide range of films, including high-end mono-layer, three-layer, and seven-layer co-extrusion lines.

The company will install additional capacity in three layer and seven-layer co-extrusion lines in the first and second quarters of 09. "It's important to continue investing in the growth of our company and increase our capabilities to produce specialty films, and this partnership boosts our ability to get stronger and bigger at a time when other companies are contracting," McClure stated.

As part of the strategic partnership, Alfred Teo, Chairman of Sigma, will serve as ISO Poly Films' Board Chairman.

About ISO Poly Films, Inc.:

Founded in 1998 by Jon McClure, ISO Poly Films, Inc. is a custom extruder of specialty plastic films for high-demand applications in the laminating, printing, coating and converting markets. Headquartered in Gray Court, SC, the company operates a 135,000 square foot facility in Gray Court, SC, and produces films that are used in a variety of packaging and protective film applications.

About The Sigma Plastics Group:

The Sigma Plastics Group was founded in 1978 by Alfred Teo and is the largest, privately owned film extrusion group in the United States, Canada, Central, and South America. Based in Lyndhurst, New Jersey, the company has 34 manufacturing facilities, producing annual through put of 1.5 billion pounds of resin and employs over 5,000. Sigma Plastics Group manufactures industrial, commercial plastic film, stretch film, merchandise bags, T-Sacks, industrial trash liners, produce bags, hygiene films, garment bags, and food bags.
